and Subsidiary Companies

## Directors' Report

To the Shareholders of  
CHROMIUM MINING & SMELTING  
CORPORATION, LIMITED:

On behalf of your Board of Directors, we are pleased to submit the Thirty-first Annual Report of the Corporation and its subsidiary companies. This Report includes the consolidated balance sheet as at April 30, 1968, the consolidated statements of earnings, retained earnings and source and application of funds for the year ended April 30, 1968, and the report of the auditors.

### Sales

Consolidated net sales amounted to \$19,809,150, representing an increase of 3% from \$19,221,794 for the year ended April 30th, 1967.

The ferroalloy industries of Canada and the United States continued to be subject to intense competition from sources outside the North American continent. In addition, sales of certain high-margin products in the United States were adversely affected by an easing in demand and an increase in competition from other domestic producers. In spite of these conditions, a modest increase in consolidated net sales was recorded, largely as a result

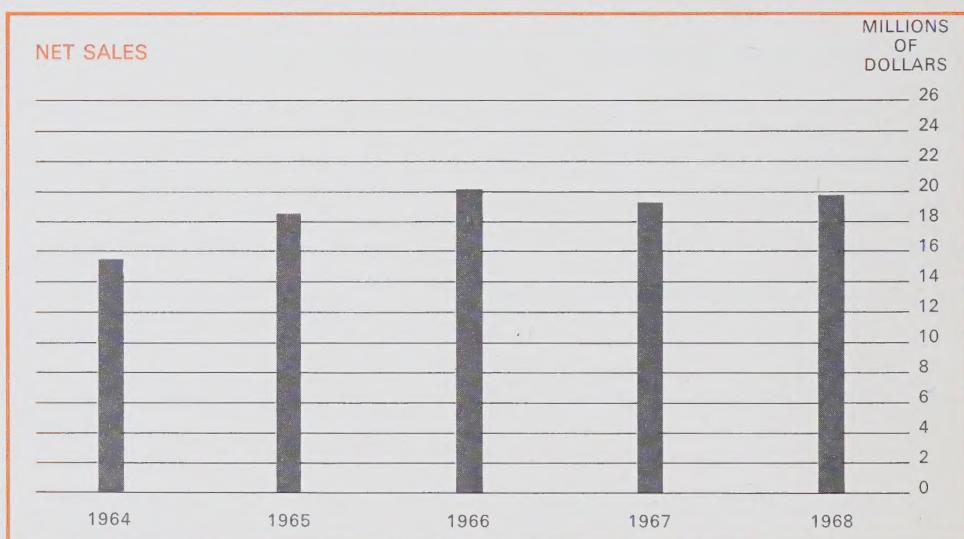

of the Corporation's previously established programs of product diversification and development and an intensified sales effort.

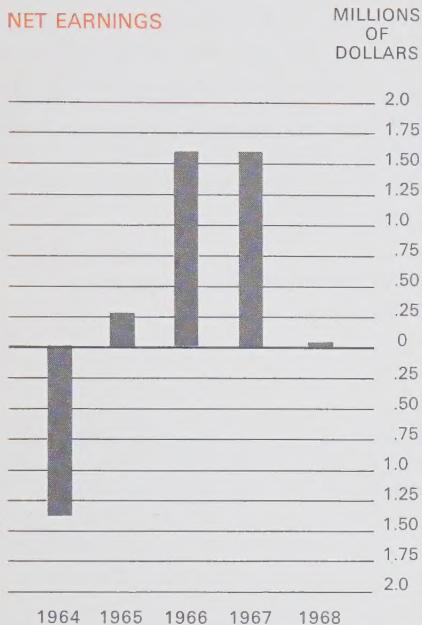

### Earnings

Consolidated net earnings, after all deductions and after giving effect to an income tax reduction resulting from the carry-forward of prior years' losses, amounted to \$36,979 compared with \$1,605,971 for the year ended April 30, 1967.

Such income tax reduction for the fiscal period under review was \$297,756 compared with \$782,815 for the previous fiscal period. As at April 30, 1968,

there remained available to the United States subsidiary company a substantial loss carry-forward which may be used as a deduction in the calculation of the taxable income of that subsidiary for the purpose of determining its liability for income taxes in the United States for the fiscal periods up to April 30, 1970. There have also been less significant losses incurred by the Parent Corporation through April 30, 1968 which may be used as a deduction in the calculation of taxable income in Canada for the fiscal periods up to April 30, 1973. Such losses are subject to audit by the appropriate taxing authorities.

Earnings were also affected, particularly at the Beauharnois Plant, by lower production rates than in the previous year, downtime of production facilities to carry out major furnace repairs and excessive maintenance costs, as well as the sale of a greater proportion of low-margin products.

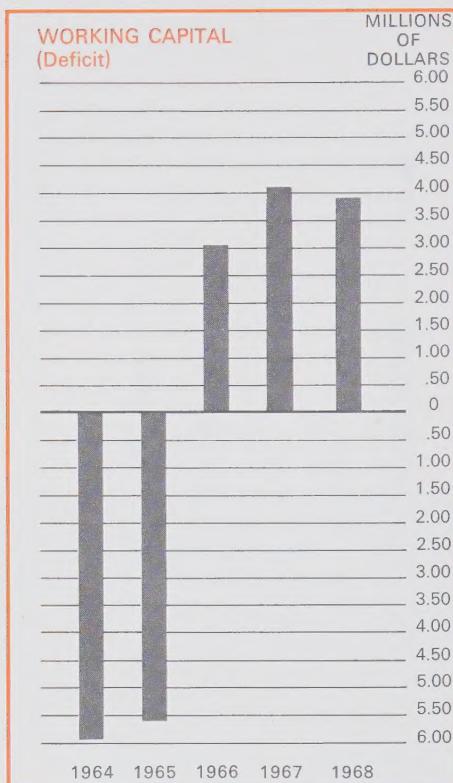

## Working Capital

Working capital totalled \$3,805,967 compared with \$4,197,798 at the end of the previous fiscal year. Current assets were 2.0 times current liabilities as at April 30, 1968, and 2.3 times current liabilities as at April 30, 1967.

Arrangements were made with an affiliated company to extend until May 31, 1970 the maturity date of the note payable to it in the amount of \$2,000,000. This has facilitated the retention of funds to implement planned capital expenditures.

As in the previous fiscal year, dividends were paid currently on the outstanding preference shares of the Corporation.

The details of the changes in working capital during the year are set forth in the consolidated statement of source and application of funds which accompanies this Report.

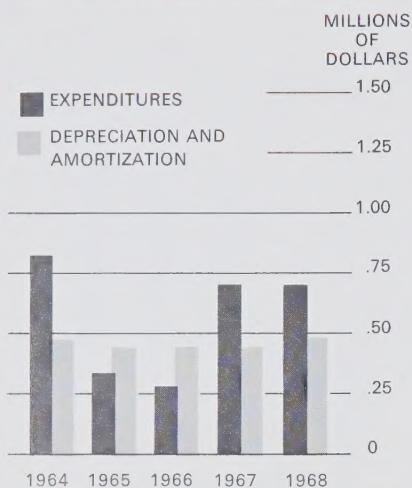

## Property, Plant and Equipment

Total expenditures on property, plant and equipment were \$694,354 compared with \$695,088 for the previous fiscal year. The program for capital expenditures continues to be concentrated on projects which will improve operating efficiency and plant productivity.

Earnings for the year reflected the impact of generally rising costs and the absence of any material improvement in selling prices. The serious inflationary trend, particularly in Canada, was a major contributing factor to increased costs, while intensified competition from sources beyond the confines of the North American continent precluded compensating increases in selling prices.

### CAPITAL EXPENDITURES AND DEPRECIATION AND AMORTIZATION

A major project has been the completion, during the year, of a new laboratory complex at the Memphis Plant, illustrations of which are displayed in this Report. This modern facility, located in a separate air-conditioned building, is recognized as one of the finest in the ferroalloy industry. It has been designed for optimum efficiency in the organization and flow of quality and process control tests and has the flexibility to take full advantage of future advances in analytical equipment.

In July 1967, the construction of a controlled atmosphere facility was completed at the Memphis Plant. This unit, which was designed and erected to meet the increased market demand for nitrided ferromanganese, represents another important step in your Cor-

oration's plan to develop a fully integrated plant at the Memphis location capable of producing a wide range of ferroalloys. Nitrided ferromanganese was first developed in our Research Laboratory in 1962. This was followed by pilot plant production and test marketing. The product has now been widely accepted and our new facility is capable of meeting current and anticipated future market requirements.

### Outlook

Current uncertainties make the forecasting of results for the new fiscal year difficult. We feel confident, however, that your Corporation will show a marked improvement in earnings, the extent of which will be dependent upon our success in offsetting higher cost trends.

Efforts are being made to check rising unit costs in order that your Corporation may remain competitive, preserve its markets and earn reasonable profits. These include a vigorous cost reduction program and improvements in operating efficiency, plant productivity and product diversification through a judicious capital expenditure program and extended technical studies.

The costs of manganese ore, chrome ore and other raw materials, which constitute major segments of our direct manufacturing costs, have been and will continue to be the subject of careful scrutiny.

Programs designed to meet the requirements of the Corporation for managerial and technical leadership were

expanded during the year. These programs, which entail the recruitment of highly qualified personnel and the training and development of all personnel through educational assistance and management development courses, will be accelerated to meet the current and long-term growth plans of your Corporation.

### Shareholders' Annual Meeting

The Shareholders' Annual Meeting will be held in the Conference Room of the Bank of Montreal, Main Floor, Stock Exchange Tower, Place Victoria, Montreal 3, Quebec, Canada, at 2:30 p.m. on Tuesday, July 16, 1968. Formal Notice of this Meeting, together with an Instrument of Proxy and Information Circular, is enclosed with this Report.

\* \* \*

The Board of Directors wishes to extend its sincere appreciation to all employees for their loyalty and diligence in the discharge of their individual responsibilities during the past year.

On behalf of the Board,

Chairman of the Board

President and General Manager

June 26, 1968.

# CHROMIUM MINING & SMELTING CORPORATION, LIMITED

and Subsidiary Companies

## Notes to Consolidated Financial Statements—April 30, 1968

1. All of the subsidiary companies are wholly owned and their accounts are reflected in the consolidated financial statements of the Corporation.
2. The consolidated financial statements are expressed entirely in Canadian currency. Foreign currencies have been translated into Canadian currency on the following basis:

Current assets and current liabilities at the rates of exchange prevailing at April 30, 1968;

Property, plant, equipment, accumulated depreciation and related depreciation provisions charged against earnings, at the rates of exchange prevailing at the dates of acquisition of the assets;

Items entering into net earnings (other than depreciation provisions) at the average rates of exchange prevailing during the year.

3. A summary of the cost of property, plant and equipment and accumulated depreciation and amortization is as follows:

	April 30, 1968		April 30, 1967	
	Cost	Accumulated depreciation and amortization	Cost	Accumulated depreciation and amortization
Land.....	\$ 122,773	\$ —	\$ 52,381	\$ —
Buildings and property improvements....	2,785,783	861,563	2,620,311	797,988
Machinery and equipment.....	7,938,228	4,282,863	7,456,319	3,942,666
Leasehold improvements.....	269,326	107,605	256,685	96,165
Construction in progress.....	80,559	—	202,363	—
	<u>\$11,196,669</u>	<u>\$5,252,031</u>	<u>\$10,588,059</u>	<u>\$4,836,819</u>

4. Bank indebtedness is secured by pledge of accounts receivable and inventories.
5. Pursuant to the Corporation's Stock Option Plan established in 1962, the Corporation has granted options to certain officers and employees to purchase common shares of the capital stock of the Corporation. As at April 30, 1968, options in respect of 39,700 shares were outstanding at prices ranging from \$1.23 to \$1.95 per share with expiry dates ranging from June 1969 through April 1973.
6. A plan for the refinancing of the Corporation was implemented during the year ended April 30, 1966 providing, inter alia, for the elimination of the then existing deficit.
7. The aggregate direct remuneration paid to the Directors and Senior Officers of the Corporation, by the Corporation and its subsidiary companies whose financial statements are consolidated with those of the Corporation, amounted to \$153,980 for the year ended April 30, 1968 and \$155,768 for the year ended April 30, 1967.
8. Pension costs charged against earnings during the year under review include amounts paid or payable to trust funds in respect of current and past services. Past service costs are being funded over periods of twenty-five (25) years ending in 1990 for the Parent Corporation's pension plan and forty (40) years for the United States subsidiary company's pension plans. The total unfunded past service liability at April 30, 1968, as determined by independent actuaries, was estimated at approximately \$974,000. The unfunded past service liability is subject to continuance of the pension plans and the terms and conditions of the pension plan agreements.
9. The United States subsidiary company has a substantial unused loss carry-forward from 1964 and 1965 which may be used for United States income tax purposes to offset taxable earnings of that subsidiary in the period 1969-1970. Such loss carry-forward is subject to audit by the taxation authority concerned.
10. The Corporation has long-term lease agreements for office and production facilities terminating in 1976 and 1983 respectively. Annual rental charges aggregate approximately \$275,000.

**Auditors' Report**

To The Shareholders of  
Chromium Mining & Smelting Corporation, Limited

We have examined the consolidated balance sheet of Chromium Mining & Smelting Corporation, Limited and subsidiaries as at April 30, 1968 and the consolidated statements of earnings, retained earnings and source and application of funds for the year then ended. Our examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as we considered necessary in the circumstances.

In our opinion these financial statements present fairly the financial position of the companies as at April 30, 1968 and the results of their operations and the source and application of their funds for the year then ended, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year.
